Studienarbeit aus dem Jahr 2010 im Fachbereich Englisch - Grammatik, Stil, Arbeitstechnik, Note: 1, 3, Universitt zu Kln, Veranstaltung: English Grammar: Synchronic and Diachronic Aspects, Sprache: Deutsch, Abstract: The terms synthetic language and analytic language in connection with linguistic typology have become commonplaces in contemporary linguistics. They refer to morphological or rather morpho-syntactic characteristics of languages. Whereas analytic languages have very few affixes (for example, Modern English), synthetic languages have many (for example, Latin, Old English). (OGrady et al. 1997: 334) Using the quantifiers very few and many, this definition by OGrady et al. shows that it might be problematic to speak about synthetic and analytic languages as fixed or closed categories in a structuralist way. They rather denote prototypical categories or general tendencies, as there is hardly any language which entirely belongs to one or the other category. Even a prototypically analytic language like Present-Day English (PDE) has both grammaticalized synthetic elements and tendencies towards new syntheticity, as OGrady et al. or Danchev have shown. In a synthetic language, four lexiccal categories are usually concerned with inflection: verbs, nouns, pronouns and adjectives. Since Old English, the earliest stage of the English language, the inflectional system has continuously been reduced, and in PDE most grammatical relations are expressed through analytic constructions. The tense system of Old English consisted of two morphologically marked tenses, the present and the preterite. Futurity could be expressed through futurate constructions employing present tense or, rarely, be supported by a certain set of lexical verbs functioning as auxiliaries without losing their lexical meaning, e. g. willan to want, or sculan must. These verbs were, unlike today, fully inflected. ( . . . ) This paper will show that the decline of the...
