

## An Elementary Treatise on the Lunar Theory, with a Brief Sketch of the History of the Problem Up to the Time of Newton (Paperback)

Filesize: 9.61 MB

### Reviews

*Excellent electronic book and helpful one. I could comprehend everything out of this published e book. I discovered this pdf from my i and dad suggested this book to discover.  
(Dr. Daphnee Homenick II)*

## AN ELEMENTARY TREATISE ON THE LUNAR THEORY, WITH A BRIEF SKETCH OF THE HISTORY OF THE PROBLEM UP TO THE TIME OF NEWTON (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1853 Excerpt: .each. 62. Third method. When the constants which enter into the arguments have been determined by the first method, we may obtain any one of the coefficients independently of all the others by the following process, provided the number of observations be very great. Let the form of the function be  $V=A+B \sin 0 + G \sin / + c$ , and let it be required to determine the constants A, 2?, (7, c. separately; 0, j, c. being functions of the time. Let the results of a great number of observations corresponding to values 0 0S, 03, c, , , c, be  $V_t$ ,  $F$   $P$  c.; so that  $V_t = A + B \sin \theta_l + C \sin / + c$ ,  $F_2 = A + B \sin 02 + C \sin 2 4 c$ ,  $V_3 = A + B \sin 0s + C \sin 3 + c$ ,  $V_n = A + B \sin 0n + C \sin 0n + c$ . Now, n being very great, we may assume that the periodical terms will, on the whole, be as often positive as negative; and E 2 therefore, that if we add all the equations together these terms will cancel one another; which determines the non-periodic part of the function. To determine B. Let the observations be divided into two sets separating the positive and negative values of  $\sin \theta_l$ ; then the other periodical terms, not having the same period, may be considered as cancelling themselves in adding up the terms of each set. Let there...
