Excerpt: . . . and less, come down at length to the central point; and the diffusive matter, simultaneously with the diffusive force, is exhausted. 1 We have now the sphere filled, through means of radiation, with atoms equably diffused. The two necessary conditions--those of radiation and of equable diffusion--are satisfied; and by the sole process in which the possibility of their simultaneous satisfaction is conceivable. For this reason, I confidently expect to find, lurking in the present condition of the atoms as distributed throughout the sphere, the secret of which I am in search--the all-important principle of the modus operandi of the Newtonian law. Let us examine, then, the actual condition of the atoms. They lie in a series of concentric strata. They are equably diffused throughout the sphere. The atoms being equably distributed, the greater the superficial extent of any of these concentric strata, or spheres,...
