

British Entomology, Being Illustrations and Descriptions of the Genera of Insects Found in Great Britain and Ireland Volume 11 (Paperback)

By John Curtis

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1834 Excerpt: .Seminationis Fab.--Curt. Guide, Gen. 1311. 1. Black with a few hairs of the same colour, long on the back part of the head, thorax and scutellum; eyes margined white with a ferruginous streak above; thorax, scutellum and abdomen cinereous ochre above, punctured with black, underside of the latter ochreous, excepting the apex, which is entirely black: wings black, with a yellowish tinge, the costa inclining to ferruginous at the base, covered with numerous white spots varying in size, leaving a black space across the middle nearly free from spots, and sometimes another towards the apex less distinct; halteres fuscous. In the Author's and other Cabinets. Meigen has erroneously referred Moses Harris's figure of our insect to the *P. umbrarum* Fab., a species hitherto not detected in this country. It is stated to be not uncommon in France, but I only observed it on the...

Reviews

Very beneficial to all of class of people. I am quite late in start reading this one, but better then never. You may like just how the writer create this publication.

-- **Audra Klocko PhD**

Thorough information! Its this type of great go through. It is amongst the most incredible publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.
